-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 2614

1. Applicant's arguments filed on 4/16/04 regarding amended rejected claims 1-4 have been fully considered but they are not persuasive, explained as follows in the context of the rejection.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-4 stand rejected under 35 U.S.C. 102(e) as being anticipated by Rinaldi.

Reviewing Rinaldi, his Y/C separator and method therefor (noting particularly Figs. 1a, 2 and 3) includes a comb filter 104, (what can be designated) a sub-detector 116 for determining which of a plurality of correlation ranges an applied signal is situated (col. 3 lines 16-25 and lines 40-43), the ranges initially determined in response to assigned adjustable threshold levels (col. 3 lines 44-47), and wherein the range can be shifted (realized by adjusting the thresholds 210a and 210b) upon determining that the correlation is beyond a certain level (col. 3 line 56 – col. 4 line 13, the detecting being carried out by any of alternative means, as specified in this text).

Applicant argues the added claim language of the video signal and delayed version of the video signal, both used for comparison with predetermined reference value (paraphrased) as not being taught by Rinaldi.

However, the subdetector of Rinaldi (element 116) does in fact have the video signal and delayed versions of the video signal supplied thereto by immediately preceding element 114,

Art Unit: 2614

wherein shown in detail in Fig. 4 plural delay elements are arranged to provide the input signal and delayed versions thereof for correlation comparison (in both the vertical and horizontal directions) carried out by element (subdetector) 116 detailed in Fig. 2. The initially set threshold values are also applied in element 116 for comparison, thereby meeting claims 1 and 2.

As for claims 3 and 4, the correlation range can be shifted upward or backward by adjusting the threshold levels stated higher or lower when the video signal exceeds a certain range (noting again col. 3 line 56 – col. 4 line 13).

3. Claims 5-15 remain allowable over the prior art. (It is noted that the examiner listed 20 claims in the last Office action, but there only were 15).

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
